

1

This diagram shows the components for the front door assembly. It includes a large door panel with a handle, a lock mechanism, and various mounting brackets and screws. The components are arranged in a way that shows how they fit together.

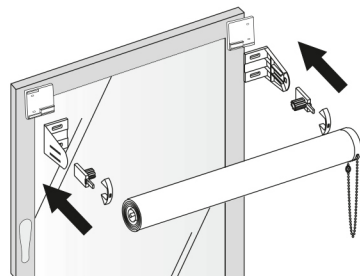

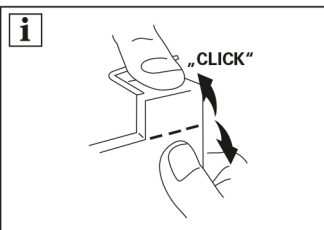

2

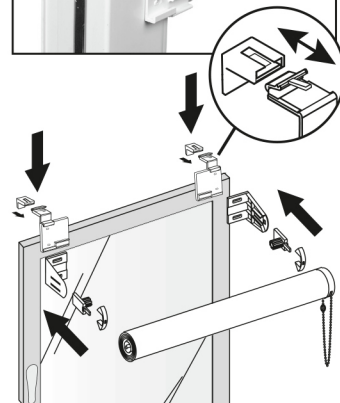

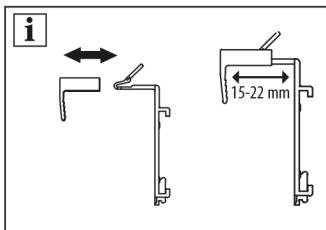

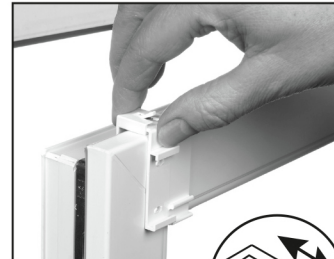

Diagram 2 illustrates the step of attaching the bottom rail. A rectangular frame is shown with three sides. A bottom rail is positioned to the right, with an arrow indicating its placement at the bottom-left corner. A screwdriver is shown to the right of the bottom rail, with an arrow pointing to its end. A screw cap is shown to the left of the top-left corner, with an arrow pointing to it. A screw is shown to the right of the top-right corner, with an arrow pointing to it.

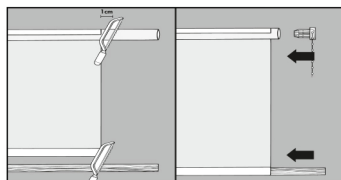

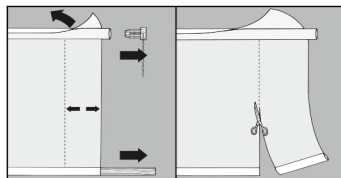

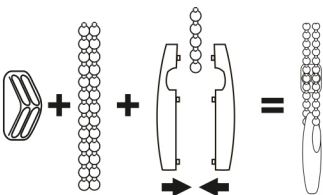

3

A close-up photograph showing a hand placing a white plastic hinge component onto a white window frame. The hinge has a rectangular base with a small protrusion and a metal pin attached to it. The hand is shown from the side, with fingers gripping the hinge to align it with the frame.

4

A black and white illustration showing a baby in a crib. The baby is standing on the edge of the crib, reaching up towards a window blind. A large warning sign (a triangle with an exclamation mark) is positioned to the left of the crib. A large red 'X' is drawn over the baby's arm and the window blind, indicating that this action is dangerous and should not be done.

Beds, cribs, and furniture are to be located away from cords for window coverings. Do not tie cords together. Make sure that cords do not twist and create a sling.
